PROFESSIONAL SUMMARY

Aspiring Python Full Stack Developer proficient in Python OOP, Django, Django REST Framework (DRF), REST APIs, SQL, ORM, JSON, JavaScript, React, HTML5, and CSS3, with foundational knowledge in Core Java. Experienced in building responsive web applications, developing scalable backend services, managing secure database workflows, and deploying production solutions on Linux environments using Nginx and Gunicorn.

TECHNICAL SKILLS

Backend & Python: Python, Django, REST APIs, MySQL, Core Java
Frontend & Web: React, JavaScript, HTML, CSS, Bootstrap, JSON
DevOps & Tools: Linux VPS, Nginx / Gunicorn, Git, GitHub, Postman, C++, Arduino IDE

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

March 2026 – July 2026

Client Project • Live URL: www.gifthub.sale

Tech Stack: Python, Django, MySQL, HTML, CSS, JavaScript, Razorpay API, Google OAuth, Hostinger SMTP

- Architected and developed GiftHub.sale, a full-scale e-commerce digital gift card and voucher selling platform.
- Deployed the production application on a Linux VPS using Nginx, Gunicorn, and SSL, utilizing cryptographic encryption to protect database voucher codes.
- Integrated secure OTP-based user authentication and notifications using SMTP mail services alongside Google OAuth social login.
- Engineered a comprehensive admin panel using Python and Django ORM to streamline voucher inventories, approvals, and order tracking.
- Integrated Razorpay API payment gateway workflows to guarantee secure and seamless online transactions.

Frontend Developer Intern

June 2024 – July 2024

IBM SkillBuild

- Developed responsive web interfaces using HTML, CSS, and JavaScript, ensuring cross-device compatibility.
- Significantly improved UI performance and accessibility metrics across desktop, tablet, and mobile platforms.
- Collaborated directly with cross-functional teams to implement dynamic and functional UI components.

PROJECTS

Logistics Management System

Aug 2026 – Sep 2026

Live URL: logistic-project-zj01.onrender.com

Tech Stack: Python, Django, MySQL, HTML, CSS, Bootstrap, Git, Render

- Developed a web-based logistics management system using Django and MySQL with role-based access for Admin, Customer, and Driver.
- Implemented order creation, driver assignment, location management, delivery tracking, and order history modules.
- Implemented automatic driver assignment based on driver availability, location, and package weight capacity.
- Utilized Git and GitHub for version control and automated continuous deployment on Render.

IoT-Enabled Waste Segregation & Monitoring

Dec 2024 – May 2025

Arduino IDE, C++ • **Patent Published**

- Engineered an IoT-based smart bin capable of automatically classifying waste into dry, wet, or metal categories using sensor arrays.
- Integrated sensors and microcontrollers utilizing the Arduino IDE and C++ for precise sorting.
- Enabled real-time waste level monitoring and implemented automated alert notifications for efficient disposal management.

Echo AI Assistant

May 2024 – Dec 2024

Python, Google APIs

- Designed and developed a voice-controlled personal assistant leveraging Python and Google APIs.
- Implemented keyword-based response mechanisms and interactive user features to improve task automation.

EDUCATION

Master of Computer Applications (MCA)

2023 – 2025

B.S. Abdur Rahman Crescent Institute of Science and Technology • **CGPA: 9.44**

Bachelor of Computer Applications (BCA)

2020 – 2023

Bharath Institute of Higher Education And Research • **CGPA: 8.83**

HSC & SSLC

2018 – 2020

C.S.I. Corley Higher Secondary School

CERTIFICATIONS

- Full Stack Web Development in Python – Softlogic Academy (SLA)
- Data Science using Python – SWAYAM
- Cyber Security
- Hardware and Networking

SOFT SKILLS & LANGUAGES

- Team Collaboration & Problem Solving
- Client & Technical Communication
- Languages:** English, Tamil
